Regarding your draft cleanup plan for the Willamette River.

I have lived in Portland for more than 37 years and love our rivers, bridges and the environment they help create. I am very concerned about the draft cleanup plan EPA has created for the Willamette.

1. The draft cleanup plan leaves far too much of the river contaminated for our children and our children's children. I do not want to leave the river still contaminated. I agree with the Portland Audubon recommendation that at least 1,000 acres of polluted sediment be removed from the river.
2. I don't understand what is meant by "monitored natural recovery." How is the river going to be monitored? Who is going to do it? and more importantly, it appears to me this suggested policy is really a "do nothing" strategy. I don't want our children facing this same issue in the years to come.
3. I am totally opposed the Fish Consumption Advisory and want it dissolved. I want fish in the Willamette to really be safe to eat and I want the river to be safe swim it. Today I would not do either.
4. Toxic dredged sediments must be taken to an appropriate landfill.
5. Entities with liability for the pollution must be held accountable and pay for a comprehensive cleanup that will protect the health of our communities, our environment and our wildlife.
